

## NEWS: Ike Lockridge Engine in Gas Engine Magazine

Ike Lockridge and his 1912 Stover 4 hp Type YB vertical engine are featured in the June/July 2016 issue of the very prestigious Gas Engine Magazine. The article "From Wreck to Running" notes the poor condition of the engine with parts missing and broken when Ike purchased it. In the article, Ike gives credit to several engine enthusiasts who helped. They include Mark Churchill from Minnesota who took parts from his Stover and made cast replicas of the much need items, Rick Lockridge who did lots research for info and parts on the Internet, Gene Addington who welded the very important broken boss, which holds the camshaft, and to all the Tired Iron engine guys who helped out. All these folks deserve the credit and thanks Ike bestows upon them, but Ike, through all the restoration, was the catalyst, and it is he who is standing beside the finished machine in the photograph included with the article.

This is not the Gas Engine photo. The photo was taken this week in Mount Pleasant, Iowa, at the Old Threshers Reunion where Ike has the engine on display. Notice the proclamation on the board.
